

A photograph showing several hands of different people holding a wooden ball-and-stick molecular model. The model consists of several brown spheres connected by thin wooden sticks, held together in a cluster. The background is a blurred green outdoor setting.

CoCreAid Kit 4.0

Unlocking the potential of digital co-creation between HEIs, NGOs, and citizens

European Higher Education Institutions (HEIs) are increasingly engaged in society and therefore play a growing role in regional and social development. By analysing current success factors and barriers to digital

co-creation and identifying suitable platforms and methods for digital collaboration, the CoCreAid Kit 4.0 has a direct impact on societal engagement while promoting cooperation between NGOs and HEIs.

FH MÜNSTER
University of Applied Sciences

Co-funded by the
Erasmus+ Programme
of the European Union

Within the CoCreAid Kit 4.0, we aim to create an impact on digital co-creation between HEIs, NGOs, and citizens. To do this, we perform the following activities:

Result 01
Digital Solution Report

We create greater awareness and understanding of success factors and transfer barriers in co-creation projects between HEIs and NGOs. We define requirements for digital work in terms of platforms, methods, and digital skills.

Result 02
CoCreAid Kit 4.0

We develop an "easy-to-use" graphical user interface (CoCreAid Kit 4.0) that serves as an all-in-one solution for digital co-creation. The "CoCreAid Kit 4.0" guides the user through a wide variety of digital platforms and co-creation methods depending on the progress of the project.

Result 03
Pilot Test & Validation Report

We pilot-test and validate the graphical user interface and modify it to create a final, user-friendly version of the platform.

Result 04
Multiplier Events

To scale the use of the digital platform to a broad target group, we aim to hold several multiplier events.
