

Lean Innovation for Mirco Enterprises: LIME (European project)

Description

Lean innovation offers an alternative route to innovation: a cost-effective and low-tech approach. It prioritises design thinking and agile experimentation to generate value-maximizing products and services, thus helping small businesses grow despite their economic conditions. In addition, unlike traditional innovation, which is resource-dependent, lean innovation is a knowledge and skills-based approach. The project's overall goal is to introduce the lean innovation skillset to education system and economies. The project was implemented before the COVID-19 pandemic. Due to the physical distance between the project partners, the activities were performed online.

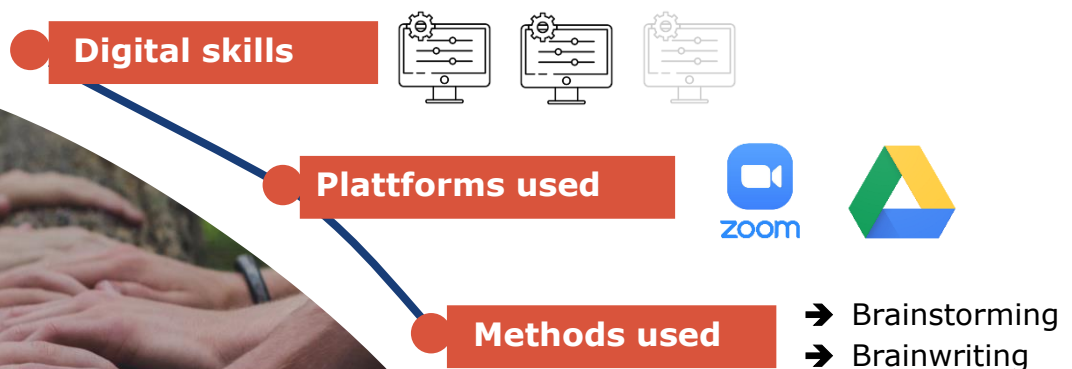

Partner organisations

- [European E-Learning Institute](#) (EUEI, Denmark)
- [Banbridge District Enterprise](#) (Ireland)
- [National Enterprise Network](#) (United Kingdom)
- [Centro Europeo de Empresas e Innovación](#) (CEEI, Spain)
- [Feltech Software Innovations](#) (Ireland)
- [Szczecin Univeristy](#) (Poland): University

What worked well?

Clear division of roles and responsibilities of individual project team members, regular meetings

- **Learning:** The use of digital tools in the project promotes outcomes that will benefit the audience (Lean Innovation Online Course).

www.cocreaid.eu

CoCreAid Kit 4.0

The CoCreAid Kit 4.0 focuses on overcoming barriers to cooperation arising when HEIs and NGOs co-create digitally. By offering a digital platform with various digital tools and methods, the aim is to increase social impact in participating European countries and beyond.
