

# co cre aid

Our project “**CoCreAid Kit 4.0**” has reached the **first milestone!** Together with our four partners from different European countries, we are contributing to improve digital co-creation with NGOs, Higher Educational Institutions and citizens.

We have now published a **report** with many insights into our research findings on **qualitative interviews** with NGO and HEI project members.

Furthermore, there are some **best practice cases** for co-creation in a digital environment. There is also an **overview** of many **tools** and **methods** that can improve online collaboration.

Just scan this QR-Code to **download the report**

In the next step, we will develop an "easy-to-use" platform that serves as an **all-in-one solution for digital co-creation**. It guides the user through the wide variety of digital platforms and co-creation methods depending on the progress of the project.

“

*With CoCreAid we are overcoming the barrier of distance in co-creation projects, especially regarding rural regions, through creating an open online platform for collaboration. We are creating useful, high-quality learning resources, methodologies and tools to encourage the cooperations between HEIs, NGOs and citizens.*

Check out our website to keep up to date with the next milestones.

Stay tuned!
