

Our project “**CoCreAid Kit 4.0**” has reached another **milestone!** Together with our four partners from different European countries, we are contributing to improve digital co-creation with NGOs, Higher Educational Institutions and citizens.

We are excited to announce the launch of CoCreAid Kit 4.0. This new release offers a wealth of resources and insights, drawing from our extensive research. We have conducted in-depth qualitative interviews with members of NGOs and HEIs, providing valuable perspectives on digital collaboration. Additionally, CoCreAid Kit 4.0 includes a selection of best practice cases that showcase effective co-creation in digital environments. Along with these insights, you'll find a comprehensive overview of various tools and methods designed to enhance online collaboration. This makes CoCreAid Kit 4.0 an invaluable resource for anyone looking to improve their digital co-creation efforts.

In September 2023, the CoCreAid Team had an important partner meeting at the Polish University of Szczecin, bringing together project partners from Italy, Turkey, Denmark, and Germany. This meeting was a crucial platform for sharing progress, exchanging ideas, and planning future strategies for our digital co-creation project.

The discussions were enriched by diverse perspectives from each country, strengthening our network and collaboration. The event marked a significant step in our joint efforts and set a solid foundation for our future work.

We're moving forward to pilot the CoCreAid Kit 4.0, a user-friendly tool designed to streamline digital co-creation. This Kit simplifies access to a variety of digital tools and methods, tailored for different stages of project development. The pilot phase will focus on refining the Kit, enhancing its effectiveness for our collaborative network.
